

"A hello, a handshake, a helpful spirit –these are things everyone should expect to find at any business that cares about customers and these are exactly what you'll find here at Torgerson's."

A FEW WORDS FROM BRION ...

Dear Friends and Neighbors,

Here at Torgerson's, we believe in creating relationships, not just customers. Our goal isn't to just make a sale, it's to earn your trust, your respect and ultimately, your loyalty. Authentic relationships are what matter and we believe in always extending the same kind of attention and dedication to our customers as we do to our employees.

That means we don't simply send you down an aisle, we walk you to the part, the department or the person you need. We don't up-sell, we help. The point isn't to get another transaction but to assist you in thinking about what purchase is right for you. We follow through and follow up, everytime.

Great customer service is not that hard to do yet it seems to be harder to find. One of the essential components of great customer service is simply saying, "thank you". So to all of our customers who have looked to us to help them grow, all of our customers who continue to bring us their business and all of our customers-yet-to-be, you are who we work for, you are why we're here and you are what drives us to be better. So for that and more,

THANK YOU.

Sincerely,

Brion Torgerson

CERTIFIED CUSTOMER PROGRAM...

...OR "WORK COMMITTED" SPECIALS

ANNOUNCING OUR NEW CERTIFIED CUSTOMER PROGRAM — TORGERSON'S BEST STANDALONE OFFER YET!

What's the best way for your business to succeed in today's competitive market? That's simple: Plan ahead. For today's farmers and ranchers, so many industry variables exist that your time is real money. At Torgerson's, we know you need your equipment in peak running condition to ensure that when your crop is ready and the weather breaks, your machines don't break too. Uptime is a must.

To meet your needs, Torgerson's is proud to introduce our new Certified Customer Program, which provides a **10 percent discount on both parts and labor for each piece of equipment that is enrolled by Dec. 31, 2011 (inspections not included)**. The program is designed to increase your uptime and offers year-round protection should your equipment experience any breakdowns. As a certified customer, you'll also be able to take advantage of an array of specials offered by Torgerson's and save even more.

Here's how the Certified Customer Program works:

1. **Sign up individual units in the program by Dec. 31.** All equipment qualifies, including tractors, hay machines, combines, air seeders, etc.
2. Each piece of enrolled equipment goes through Torgerson's inspection program.
3. Our experienced technicians will determine what work each piece needs and will review the inspection with you.
4. Once the work is approved by you, our technicians will complete it, and for the next 12 months any time you need additional repairs, you'll receive a **10 percent discount and 90 days same as cash on the repair order**. Parts purchased over the counter do not qualify for the discount. Only repair orders qualify for the 10% discount on subsequent repair needs.
5. In order to qualify and receive the "certified" designation, the unit must be at recommended specifications and the work done by Torgerson's. All work completed will receive a seasonal warranty.
6. After your machine has been inspected and has had the required work done by Torgerson's technicians, it will receive our official certification sticker. This sticker certifies that all repairs have been kept to recommended specifications, adding value to your unit at trade-in time.

By getting your equipment inspected and repaired in the off-season, you can now get discounts on the work you'll need during the season, while also helping us streamline our operations and eliminate many scheduling hassles during the busy harvest season.

Save Time and Save Money. Call your Torgerson's service department and enroll your units in the Certified Customer Program* TODAY!

*This offer cannot be combined with any others from Torgerson's.
